(For immediate release Dec 13, 2011)

More jobs to be created with ProXcel's tie-up with UST, Lumen Systems

LANGKAWI (Dec 13, 2011): Felda technology arm ProXcel Sdn Bhd is expected to contribute towards the creation of jobs in the high-tech service industry.

Its chief executive officer Chrisoph Zilian said that local and international collaborations were critical to create the foundation for sustainable growth.

Zilian said in a statement released today that the collaborations with two companies were to provide and enhance systems solutions capabilities with two highly reputed companies, one local and the other a Canadian-based firm.

The collaborations were signed at the recently concluded Langkawi International Maritime and Aerospace Exhibition (LIMA 2011).

ProXcel, a Felda Global iA Group joint venture company firmed up the collaboration with Unmanned Systems Technology (UST) Sdn Bhd and Lumen Systems Ltd in a MoU signing ceremony witnessed by RMAF chief Gen Tan Sri Rodzali Daud.

Christoph Zilian, said the tie-up with Unmanned Systems Technology Sdn Bhd (UST) a subsidiary of Composites Technology Research Malaysia Sdn Bhd (CTRM), was aimed at developing and delivering Unmanned Aerial System (UAS)-based sensory services to enhance Malaysia's competitiveness in the agricultural sector. UST, he said would be responsible for research and development, manufacturing and marketing of the UAS.

The other collaboration, he said was with Lumen Systems which was set to address requirements of the defence sector. Mature high value assets such as aircrafts are upgraded with latest technology to extend their service life. This he said, would help to maximise utilisation and increase functionality of RMAF assets. - **Ends/APRC**

About PROXCEL SDN BHD: ProXcel is a joint venture between Felda Global and the iA Group set up in 2010. The company is specialised in technology services and solutions.
